

SAP Consolidation

Faster, better quality and less expensive conversion, migration and SAP system harmonization services

SAP CONSOLIDATION

smartShift from CTE provides unique SAP System Consolidation services for organizations who want to standardize business processes or cut IT maintenance, licensing and operating costs by reducing the number and complexity of their SAP systems. smartShift's approach provides best-of-breed tools-based services that detect conflict issues, increase system efficiency and availability while standardizing, consolidating and converting custom ABAP code across SAP instances, release levels, and locations.

WHAT MAKES SMARTSHIFT UNIQUE

Unlike other SAP consolidation approaches that require lengthy code freezes and large teams of programmers to manually compare objects and iteratively make ABAP code changes, smartShift provides organizations efficient, secure, patented and automated SAP consolidation solutions that scope projects accurately, improve code quality and mitigate project risks while drastically reducing costs and dramatically saving time so IT can deliver better results to business customers faster.

Additionally, within a consolidation project, smartShift *uniquely* can combine automated release upgrade and Unicode enablement transformation services.

BENEFITS

- Reduce SAP Consolidation project costs
- Improve project quality and system performance
- Scope ABAP and object transformation efforts accurately
- Deliver better results to customers faster
- Mitigate project risk

FEATURES & CAPABILITIES

Preparation Phase

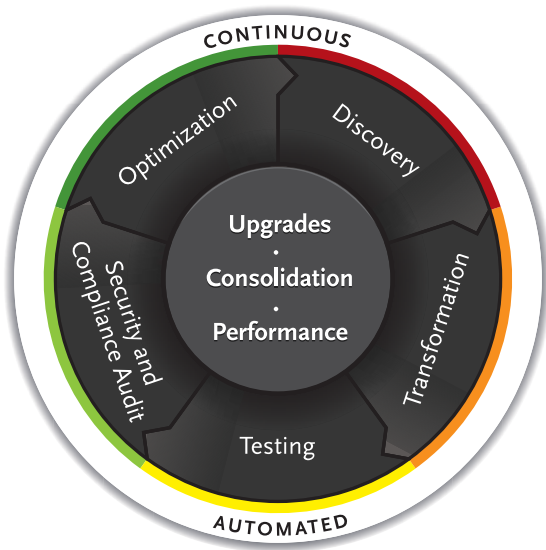

- Multi-way comparison of custom repository objects for all involved systems, source systems and consolidated systems
- Detailed reporting on conflicts for custom repository objects
- Discovery of naming conflicts per object type
- Content conflicts for source code objects (reports, function groups, classes, interfaces, user exits, etc.).
- Definition conflicts for data dictionary objects

Execution Phase

- Automatic clone creation of objects in conflict that need to be moved to the target system
- Possible combined Unicode / Release upgrade
- Customization corrections (hard-coded literals: e.g. company codes)
- Integrated transport functionality that adheres to SAP's transport mechanism (changes are grouped and traced)

OTHER SERVICES

smartShift offers smartDISCOVERY, smartTRANSFORM, smartTEST, smartCOMPLIANCE and smartOPTIMIZE. These core components can be purchased individually or bundled in a variety of solution sets - Upgrade/Unicode Solution, Consolidation Solution, Performance Optimization Solution.

DEPLOYMENT MODELS

You can choose from a range of deployment models including SaaS, remote or onsite services or through System Integrators such as Accenture, Capgemini, IBM, SAP and many others.

ABOUT SMARTSHIFT

smartShift, a Cambridge Technology Enterprises (CTE) company, is the leading provider of solutions for automated optimization of SAP custom code. smartShift uses patented technology, tightly integrated with best practices methodology. Perfected over two decades and hundreds of customer implementations, smartShift solutions are designed to deliver results in very tight timeframes at lower costs.
